

July 8, 2016

TO: Autocar, LLC. Supplier
FROM: Autocar, LLC.
SUBJECT: NEW TRANSPORTATION ROUTING INSTRUCTIONS

We are pleased to announce our collaborative logistics partnership with Transplace. We have contracted Transplace to manage all of our common carrier logistics operations. As an important supplier to Autocar, LLC., we look forward to your commitment to this new freight routing program.

Transplace's web-based logistics system provides us distribution visibility and effective load arrangement. The program links all aspects of our supply chain operations, providing visibility and collaborative transportation management among our suppliers and customers.

The system will be set up to allow you to input shipment information into our vendor portal. This is a user friendly system which will allow Autocar to have greater visibility into our supply chain. Attached to this email is a PowerPoint document which will take you step by step through the process of entering a shipment. There is also a training video which can be seen here:

<https://www.dropbox.com/s/khezv13lsd37hcs/VP%20Training%20Video.mp4?dl=0>

Beginning on **July 20th, 2016** freight shipments (LTL and TL) we will start utilization of the Transplace Vendor Portal System. Transplace/M33 Integrated will in touch with login information for the supplier portal prior to 7/20/2016. Please follow the instructions to set up your user account.

If you have any questions going forward, you can contact the Autocar traffic department at

Autocar_Traffic@m33integrated.com

866-417-2037

We look forward and thank you for your support as we onboard our managed transportation solution.

Sincerely,

Aaron Ault
Autocar LLC
